Solar Lighting Solutions Professional Certification

Baltimore, MD – BITHENERGY is pleased to announce that CEO Robert L. Wallace and R. Daniel Wallace have completed the Solar Lighting Solutions Professional (SLSP) Certification Program at SOL Inc, the leading manufacturer of solar lighting solutions.

BITHENERGY provides engineering and technical services to assist government, corporations and residential clients in maximizing the business value and efficiency of each unit of energy that is produced and consumed by the enterprise. We now can help these entities improve their operations through more environmentally responsible lighting solutions.

Adding SOL solar lighting systems to our renewable energy solutions, BITHENERGY expands our ability to support the market's need for better solar illumination, in parking lots, parks, pathways, and security applications. CEO Robert L. Wallace added, "We are excited to be affiliated with the industry's most proven, technological leader of solar powered LED area and roadway lighting. SOL Inc is a natural fit for BITHENERGY. With the greatest number of solar powered area lighting units installed and operating worldwide, SOL Inc brings exceptional capability to our customers locally and across the globe."

SOL Inc. president and CEO, Rick Schuett is expressed his delight that BITHENERGY successfully completed the SLSP Training program with SOL saying, "It is encouraging that a leader like BITHENERGY is partnering with SOL to satisfy and expand the global demand for solar lighting products and services. SOL history of successes with over 40,000 installations worldwide will only be further enhanced in this exciting and growing green market by adding Robert and Daniel as certified professionals."

BITHENERGY exhaustively searched the marketplace for leading solar light solution manufacturers and selected SOL due to the company's unique blend of experience, technology and factory support. "BITHENERGY required an industry leader with a proven installation base, leading technology, superior customer service and competitive pricing. SOL brings all of this and more, including the one of the best Warranty programs for solar area and roadway lighting in the world," said Wallace.

An SLSP is a factory trained individual who has successfully completed SOL's extensive solar lighting training program to meet the needs of customers. The training provides an understanding the fundamentals of solar power, solar light system design, SOL's competitive advantages as well as learning how to provide solutions and market one of the fastest growing segments in the green/sustainable marketplace – solar powered outdoor lighting. BITHENERGY will offer an exclusive line of solar LED light systems from SOL specifically configured to meet our customer lighting solutions need for solar illumination. With a wide selection of solar parking lot lights, pathway lights, solar security lights, and sign lighting, BITHENERGY is now able to locally and globally offer complete lighting solutions. Powered by the sun and built for long life, SOL Inc's high flux LED lighting systems offer unmatched performance.

About BITHENERGY www.bithenergy.com

BITHENERGY offers clients intelligent strategies, advanced information systems, innovative technologies, and full implementation services necessary for managing energy consumption, smart grid infrastructure build-out, and the development of hybrid renewable energy systems (HRES™). BITHENERGY provides value to its clients by meeting complex energy challenges with innovation, bold vision, and great attention to detail.

About SOL Inc – www.solarlighting.com

SOL Inc is the world leader in solar LED outdoor lighting solutions with over 40,000 systems installed in more than 61 countries on six continents. Since 1990, SOL has introduced innovative and cost-effective solar lighting systems that provide unsurpassed levels of illumination and reliability. SOL develops, manufactures and markets commercial/industrial-grade solar powered and energy efficient lighting systems for a wide range of lighting applications including area and security, street and roadways, signs, billboards, transit and shelter lighting. SOL is ISO 9001:2008 certified and committed to superior design, manufacturing, and customer satisfaction.
